VRLA, Li-ion & Accessories Range Overview

The world's leading battery manufacturer

From the deep sea to outer space

The GS Yuasa Group consists of 65 subsidiaries and 33 affiliates in countries throughout the world.

For over 100 years, the GS Yuasa Group has continually contributed to economic development and the improvement of living standards through the development and manufacture of batteries, power supply systems and lighting equipment. We are a major force in the market as one of the world's leading manufacturers of industrial, automotive and motorcycle batteries. As a supplier of high performance power supply systems, we help ensure the reliability of social infrastructure. Responding to today's increasingly sophisticated needs our extensive range of next generation energy system lithium-ion batteries encompasses not only vehicle use but also products in a wide range of fields, from deep sea to aerospace, to meet the ever more sophisticated needs of the times.

Throughout its long history, the GS Yuasa Group has worked to create innovative technology. This commitment serves as the foundation for our continuing efforts to explore new possibilities in the field of electrical energy under a corporate vision expressed in the words "Innovation and Growth".

- GS Yuasa Battery Manufacturing UK Ltd. Ebbw Vale

6

For over 30 years, GS Yuasa Battery Europe Ltd have been Europe's leading battery supplier.

From sales and distribution centres in Swindon, Milan, Lyon, Madrid and Düsseldorf, GS Yuasa supply European markets with an extensive range of high-quality energy storage and network stabilisation solutions.

Supported by experienced Quality Assurance, Technical Support, Marketing and Customer Service teams, our industry leading service and distribution network continues to set new standards in customer care, choice and year-round availability.

Furthermore, GS Yuasa can design and project manage custom battery systems.

Whatever the application, GS Yuasa have a solution to suit any requirements.

UK Manufacturing

GS Yuasa Battery Manufacturing UK Ltd is a large state of the art manufacturing facility in Ebbw Vale, Wales, UK. Production began at the site in 1982 and since then well over 80 million batteries have been produced ranging in capacity from 0.8 to 540 ampere hours.

Over 60% of products are exported, mainly within Europe. The facility produces four main product ranges - NPL, EN, ENL and SWL.

Common applications

Uninterruptible Power Supply (UPS)

Ranging in size from desk top units to large plant room installations, UPS's are a no-break backup power supply for essential equipment. Yuasa batteries can be sized to give the autonomy and load required for any project.

Batteries	typically us	ed:		
NP	NPW	SW	ENL	SLR
NPL	RE	SWL	ENL FT	
NPH	REW	EN	Lithium	

Telecoms

Broadband, land line and mobile providers have equipment that needs battery backup power in the event of a mains failure. Whether in central systems or remote cabinets Yuasa batteries are trusted by providers worldwide.

Batteries typically used:

NP	REW	EN	FXH
NPL	SW	ENL	SLR
RE	SWL	ENL FT	

Renewable Energy

Solar, wind and wave energy is not always produced at times of maximum requirement. Yuasa batteries allow energy to be stored at times of low demand and then released into the grid when demand is high.

Batteries typically used:

NP	REC	ENL FT	SLE	Lithium
NPC	ENL	FXH	SLR	

Fire & Security

- 🙏 🚯

A

17

Even the most advanced security systems are only as good as the backup batteries supporting them. When an emergency arises, Yuasa standby batteries can protect homes and businesses against crime and fire.

Batteries typically used:

Golf & Mobility

ን

Golf and mobility equipment requires batteries to be charged and then used to power the equipment. Yuasa produce specialised cyclic battery types to give maximum performance for hundreds of charge/discharge cycles.

Batteries typically used:

NPC REC

Emergency Lighting

Emergency lighting is required in commercial buildings. In the event of a mains failure, standby batteries provide light for safe evacuation. Yuasa NiCd, NiMH and VRLA batteries exceed common 3 hour run-time requirements.

Batteries typically used:

NP	NPL	NPC	REC	RE
ENL	ENL FT			

Energy Storage

Businesses are usually charged on peak power demand. Load-shedding allows large cost savings by charging batteries during low demand and injecting this stored energy back into business load at times of high demand.

Batteries typically used:

NPL	REC	ENL FT	SLE	Lithium
NPC	ENL	FXH	SLR	

Floor Cleaning & Aerial Access

Applications where deep discharges and harsh operating conditions are common, need a specialist battery solution. The Yuasa Pro-Spec range have excellent resilience against plate corrosion and deep discharge.

Batteries typically used:

Pro-Spec

Yuasa Industrial **Batteries**

To help with battery selection, and due to different application and operational requirements, every Yuasa industrial battery has been designated with a Eurobat classification or Yuasa cyclic life tag.

Eurobat is a European organisation that has produced a guide to VRLA batteries. Within this guide there are 4 design life categories. Yuasa has used the test methods as set out in an official standard, BS EN60896-21/21 to designate each battery range into one of the categories.

[]] www.gs-yuasa.de

Yuasa's innovative website is mobile-ready and features the entire Yuasa range including specifications, part numbers and photographs. It also includes a range of downloadable brochures, resources, data sheets and guides and allows users to easily:

- Find the right battery and compare products
- Search for local distributors
- Access detailed technical information and guides
- Download dynamic technical data sheets
- Calculate UPS system size requirements
- Keep up to date with the latest from Yuasa

Features every Yuasa industrial, automotive and motorcycle product with full specifications and pictures.

Y

NP Series Valve Regulated Lead-Acid Batteries

Features

- · Lead calcium grids for extended life
- Superb recovery from deep discharge
- Low discharge rate for long shelf life
- Absorbed glass mat (AGM) technology assures no free electrolyte
- High gas recombination efficiency •
- Multipurpose: Float or light cyclic use Can be used in any orientation excluding continuous inverted use
- Application specific designs

Applications

Ideal for standby and light cyclic applications including:

- Fire and security systems
- **Emergency lighting**
- Solar and wind
- UPS •
- Toys

Lithium Series GS Yuasa LIM Li-ion Batteries

Features

- Advanced maximum reliability system design
- Built in battery monitoring unit (ACS) constantly monitors the condition of each cell
- Outstanding cycle life of up to 5,000 cycles at 100% discharge
- High Charge-Discharge density capable of currents up to 600A
- Maintenance free
- Safe materials used
- in design and production

- High energy industrial systems
- UPS
- Energy storage
- Smart Grid
- AGV traction power

- Li-ion Battery Control Modules (LiBM)
- Monitors and controls the operation of up to 26 lithium ion modules
- Multiple LiBMs can be networked for larger system integration
- Provides full access to all cell data via RS485 and CANbus 2.0b ports
- 16 cell and monitoring system functions are checked continuously
- Status thresholds are configurable for all monitored parameters
- Warning and alarm outputs configurable via relay and opto-isolated NO and NC contacts
- State of Charge measured by voltage and current analysis
- On-board data logging capability
- Low power consumption at 24Vdc

Pro-Spec Multiple Purpose Deep Cycle Batteries

Features

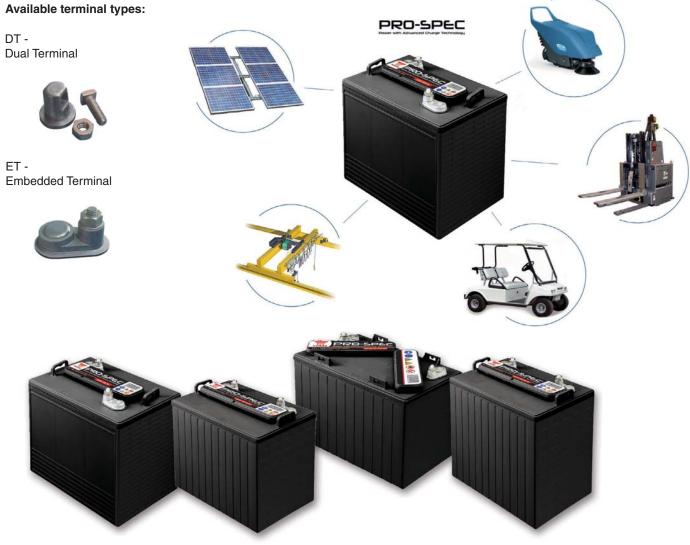

- Deep cycle
- Vibration resistant
- Easy maintenance vent caps
- AGM/porous rubber separator construction to resist corrosion and reduce electrical resistance
- Enhanced life cycle compared to competitors
- Two terminal types available
- Extended service life

Applications

- Electric vehicles including:
- Golf carts
- Mobility vehicles
- Warehouse equipment including:
- Fork lifts
- Access platforms
- Floor cleaners

 * Suggested cyclic life based on 0.25C5 3 hour discharge - 0.18C5 hour charge

Racking & Site Services

Yuasa Technical Department

The GS Yuasa Battery Germany GmbH Technical Department provides a full battery design and quotation service, including: • Battery sizing

- Open style or cladded racks, cubical design & supply
- Gas & heat calculations
- AutoCAD drawings
- Battery system testing

To discuss your project or requirements please contact us on +49 (0)211 41790-0 or info@gs-yuasa.de

Battery Sizing

Utilising Yuasa's range of VRLA batteries, the latest design software and extensive technical expertise, our engineers will find the best battery solution tailored to your requirements.

Battery Containment

GS Yuasa have a full complement of battery racking solutions available. Our popular open or cladded steel flat pack racking can be built to specification. Options including colour, tier heights, leg extensions, seismic strengthening and many more.

Gas & Heat

We can provide full calculations relating to heat output and hydrogen gas emissions of any Yuasa battery system.

Drawings

Using AutoCAD software, our engineers can provide detailed rack and battery layout drawings for your project.

Install

GS Yuasa can quote for and arrange battery installation and commissioning. Our trained engineers and over 30 years of industrial battery experience will ensure your project goes smoothly.

System Testing

We offer a full battery testing service for battery installations of all sizes. Measuring every battery for impedance and voltage, a detailed report with findings and recommendations will be issued once completed.

Yu-Power® Intelligent Chargers

Yu-Power® intelligent chargers utilise multi-stage proportional timing technology to ensure safe and efficient lead acid battery charging.

Proportional timing during the bulk charging mode ensures the best balance of maximum state of charge, without damaging the battery before switching to the float charging mode.

Once in float charge mode the charger will charge the battery and maintain it at 100% state of charge whilst using an ECO mode to save power.

YPC2A12	Yu-Power 2A 12V Charger - UK/Euro Plug c/w YPCCLIPMC
YPC4A12	Yu-Power 4A 12V Charger - UK/Euro Plug c/w YPCCLIP
YPC4A24	Yu-Power 4A 24V Charger - UK/Euro plug c/w YPCCLIP
YPC8A12	Yu-Power 8A 12V charger - UK/Euro Plug c/w YPCCLIP
YPCTESTMC	Yu-Power LED Battery Tester (trailer plug c/w YPCRINGMC)

Yu-Power®

Battery Temperature Monitoring System YPCBM1

Hardware

- Continual monitoring with hourly logging of temperature and voltage
- 7.5 years of 1 hour rolling data storage
- Readable data set via 2.5mm output socket (lead available separately part code YPCBL1)
- Optional equipment available to allow for live working
- Unit dimensions: 40mm (±1) x 40mm (±1) x 14mm (±0.5)

Software

- Configurable to requirement
- Encoded against corruption
- Exportable to master documentation for further analysis
- Exportable to graphic displays
- Common file formats (.xls, .csv, plain text)
